ABOUT US

PT Marjan Kreasindo Utama is a civil construction company committed to providing the best services in project planning, implementation, and supervision. Prioritizing quality, timely delivery, and cost efficiency, we are ready to be a trusted partner in sustainable and high-value infrastructure development. We also provide high-quality engineering, procurement, and contracting services for industrial needs in Indonesia.

ABOUT US

PT. MARJAN KREASINDO UTAMA

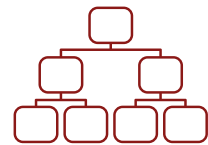

Company Strategic

PT. Marjan Kreasindo Utama provided some product such as : Chemical treatment for boiler, Boiler new packaged and used, Boiler service : overhaul, repair, upgrading fuel covertedion, Boiler rental, Fabrication of boiler, heat exchanger, vessel, tank and equipments, Erection work such as poer plant, chemical plant, etc.

Our Bussiners sector or market

Heavy industri, Utilty companies, Shipyards/shipbuilding, Building companies, House hold/sanitary equipment

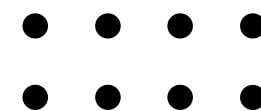

Bussines Area

PT. Marjan Kreasindo Utama has defined for bussnines areas, evectively suported by after sales activities expect the garment :

- ▶ Specially Water Treatment Chemical for Colling Tower, Chiller, Boiler and Fuel Treatment
- ▶ Specially Industrial Cleaning Maintenance chemical for Cooling Tower, Chiller, Boiler, Steam Turbine, Heat
- ▶ Exchanger, Compressor, Genset Air Handling Unit, Fan Coil Unit, Air Conditioning System, etc.
- ▶ Engineering and Manufacturing boiler, Heat Exchanger, Vessel, tank, etc.
- ▶ General Contractor in Mechanical and Electrical.

VISION & MISSION

To be a trusted and highly competitive construction company that delivers superior quality and sustainable added value.

- **Professional Excellence:** Delivering professional and timely construction services.
- **Quality & Satisfaction:** Maintaining high-quality workmanship and ensuring customer satisfaction.
- **Integrity:** Upholding integrity and transparency in every collaboration.
- **Human Capital:** Developing highly skilled, superior, and productive human resources.
- **Mutual Growth:** Growing together with partners and customers through synergy.

OUR SERVICES

1

STEAM BOILER

Safety valve, Low water cut-off, Water column blow-down valve, Pressuretrols (one is high-limit safety), Steam pressure-gauge, etc

2

HOT WATER BOILER

Expansion Tank, Low water cutt-off, Combination temperature / pressure gauge of latitude / Temperature gauge, etc

3

CHEMICAL TREATMENT & CLEANING

We offer boiler and cooling tower chemical treatment to maintain the boiler and cooling tower performance

4

VALVE & INSTRUMENT

Air Release Valve, Balancing Valve, Ball Valve, Below Sealed Valve, Butterfly Valve, Control Valve, Disc Check Valve

5

BURNER

GLT-Series, AG-Series, CD-Series, TC-Series, OM-Series, LT-Series, LB-Series, KSY-Series, GOM-Series

6

CIVIL CONSTRUCTION

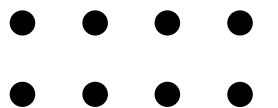

Earthwork & excavation, Foundation systems (bore pile, foot plate), Structural concrete & steel reinforcement, Masonry, Floor finishes, Roofing systems, and Infrastructure development

7

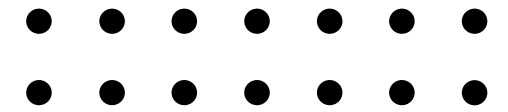

MECHANICAL & ELECTRICAL / MEP

Power distribution systems, Lighting & wiring, HVAC (Heating, Ventilation, and Air Conditioning), Fire alarm & hydrant systems, Plumbing & sanitation, CCTV & security systems, etc

www.marjanku.co.id

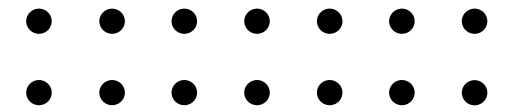

STEAM BOILER

- Safety Valve
- Low-water cutt off
- Water column blow-down valve
- Pressuretrols (one is high-limit safety)e
- Steam pressure-gauge
- Water column clean-out (cross tee)
- Bottor blow-off and drain valve
- Low-water cutt off /blow off valve

HOT WATER BOILER

- Expansion Tank
- Low-water cutt off
- Combination temp./pressure gauge or
- altitude/temp. gauge
- Pressuretrols (one is high-limit safety)
- Operating aquaste
- High limit aquaste

CHEMICAL TREATMENT & CLEANING

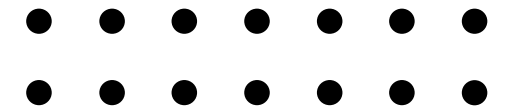

Boiler and Cooling Tower Chemical Treatment

We offer boiler and cooling tower chemical treatment to maintain the boiler and cooling tower performance, minimize blow down and protect from erosion and corrosion due to poor water quality. It also improves the boiling and cooling efficiency.

Chemical Cleaning

Chemical cleaning has long been regarded as the most efficient and least disruptive method for cleaning piping and cooling water systems, boilers, tanks and reactors. Chemical cleaning is required on new build systems to ensure that residual contamination and excess depositions such as millscale, welding slag and grease do not contaminate product or cause severe damage to rotating machinery or valves. Existing piping systems in service that are affected by contaminants, organic and inorganic scales, may in time reduce flow rates or affect heat transfers. We can provide the most technically advanced, cost-effective chemical cleaning solution for any combination of problems.

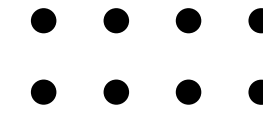

PT. Marjan Kreasindo Utama delivering complete solution for water treatment and waste water treatment.

The experienced, knowledgeable engineers and water specialists at PT. Marjan Kreasindo Utama can custom design complete integrated water treatment systems based on the specifications of the client. From feed water source to product water distribution and building specifications, the staff at PT. Marjan Kreasindo Utama can ensure that you will be completely satisfied with your custom or industry standard water treatment systems. Applications include brackish and surface water treatment systems and seawater desalination for industrial or commercial water uses. Other systems include reverse osmosis, membranes, water softener systems, membrane bioreactors (MBR), nano filtration and ultra filtration systems.

Our line ranges from basic water softeners to custom designed water treatment systems that solve a number of water treatment quality issues. We take pride.
